

SAANIDHYA CHAUHAN

Software/ Full-Stack Developer

+91 6395432731 • saanidhyachauhan35@gmail.com • Pune • [Portfolio](#) • [LinkedIn](#)

SUMMARY

Full-stack developer experienced in building responsive, production-ready web applications with React, Next.js, TypeScript, and Node.js, backed by strong database fundamentals in PostgreSQL, MongoDB, and Supabase. Builds reusable, cross-browser-compatible UI components, integrates REST APIs, and works closely with product and engineering peers to ship type-safe, performance-conscious frontend interfaces. Comfortable owning work end-to-end, from designing normalized, access-controlled databases to debugging and testing production code.

EXPERIENCE

Software / Full-Stack Intern

Feb 2026 – Jul 2026 (6 Months)

The Boring Education.

Tech Stack: React.js, Next.js, TypeScript, JavaScript, Tailwind CSS, Node.js, REST APIs, Git/GitHub, AI APIs

- Built and maintained React.js and Next.js web pages using TypeScript and Tailwind CSS, keeping layouts responsive across desktop and mobile breakpoints.
- Refactored existing frontend components into a reusable UI set, reducing duplicate code across the application and speeding up future feature development.
- Integrated REST APIs to fetch, process, and render application data, coordinating with backend engineers on response formats and error handling.
- Extended Next.js routing and basic server-side logic for new application modules, working with senior developers through code review before merge.
- Debugged and resolved frontend, responsive-layout, and API integration issues found during testing, reducing bug carryover into later development cycles.
- Extended AI-powered application features by working within existing API integrations to support new product workflows..
- Managed version control through Git and GitHub, including feature branching and pull request reviews, keeping code changes traceable and easy to roll back.

PROJECTS

TimeChamp || Full-Stack Employee Management System || [Demo](#)

Tech Stack: React 18, Vite, TypeScript, TailwindCSS, Supabase, TanStack Query, Radix UI, Lucide React, Zod, Bun.

- Built a full productivity and HR management system with specialized dashboards for real-time workforce monitoring and administrative operations.
- Added analytics using Recharts to surface visual insights into time allocation and task productivity, supporting data-driven decisions.
- Used a type-safe stack built on React 18, TypeScript, and Supabase, along with Radix UI and Tailwind CSS, to deliver a fast, responsive user experience.

Crime Reports Database || PostgreSQL Data Engineering Project || [GitHub](#)

Tech Stack: PostgreSQL, SQL (Window Functions, CTEs, Views, Indexes), pgAdmin 4

- Designed and built a normalized PostgreSQL database ingesting 320,000+ real crime incident records through a staging-table pipeline with data validation and type casting.
- Set up role-based access control (RBAC) with separate read-only and read-write user groups, and sped up query performance through multi-column indexing strategies.
- Wrote 12 analytical SQL queries using window functions, CTEs, and aggregate filtering to surface trend-level insights from the data.

AutoReporter – Automated Excel/CSV Report Generator || [GitHub](#)

Tech Stack: Python, Pandas, Jinja2, pdfkit, wkhtmltopdf, APScheduler, SMTP, python-dotenv, openpyxl.

- Built an automation pipeline that generates PDF reports from workforce data.
- Used Pandas and Jinja2 together to automate KPI processing and report rendering.
- Set up automated email dispatch for weekly reports to project stakeholders.

Modern LMS Platform || Full-Stack Learning Management System || [GitHub](#)

Tech Stack: React.js, Tailwind CSS, Node.js, Express.js, PostgreSQL, Prisma, JWT, bcrypt.

- Built a full-stack Learning Management System enabling instructors to create, manage, and publish courses through a dedicated dashboard.
- Implemented JWT-based authentication and role-based authorization for student and instructor accounts, with protected backend routes.
- Developed course management functionality including course creation, editing, deletion, publishing, and dynamic status tracking using PostgreSQL and Prisma ORM.
- Designed a responsive instructor workspace with sidebar navigation, course settings, and dashboard components using React.js and Tailwind CSS.

EDUCATION

B.Tech in Computer Science (CSE)

Uttaranchal University, Dehradun

Aug 2022 – May 2026

CGPA: 7.0 / 10

SKILLS

Programming Languages: Java, Python, JavaScript, TypeScript

UI Frameworks & Frontend: React 18, Next.js, HTML5, CSS3, Tailwind CSS, Three.js, React-Three-Fiber, Radix UI, Lucide React

Backend & APIs: Node.js, Bun, REST APIs, Supabase, Firebase, Express.js

Databases & Data: PostgreSQL, MySQL, MongoDB, SQL, Python (Pandas)

Architecture & Practices: Component-based UI architecture, JWT authentication, role-based access control, responsive design.

Tools & DevOps: Git, GitHub, GitHub Actions, Docker, wkhtmltopdf, pdfkit, python-dotenv, openpyxl.
